*The value of cryptocurrencies tends to change very quickly, the price is derived from the continued confidence of market participants. There is no guarantee that the cryptocurrencies' value will remain stable. The characteristics of cryptocurrencies mean that legal or technological changes experienced by a virtual cryptocurrency exchange may result in the potential for permanent and total loss of value or the total loss of the availability of prices. HYCM has no control over movements in the underlying prices, which may be volatile and unpredictable. Those movements will affect HYCM's prices, whether or not you can open and close a position and the price at which you can do so.*

Kind regards,  
HYCM Team
